Hi Rafael – I contacted you last year about the RI/FS at the Falcon Refinery. At that time, the RI/FS Work Plan was not approved. What is the current status? I would like to get a copy of the plan if it has been finalized.

Regards,

Matt

Matt, the EPA's contractor has prepared the RI/FS Work Plan, needed to complete Phase II of the RI, but this document has not been approved by the EPA. Once approved, the contractor will prepare the Field Sampling Plan and Quality Assurance Project Plan for the additional work. Additionally, all of the previous data collection efforts will be summarized and discussed in the RI Report prepared the EPA's

9597512

contractor after the Phase II field sampling effort is completed.

Please call me if you have any additional questions.

Subject: Falcon Refinery Superfund Site

Hi Rafael – can you tell me the status of the work being performed at the Falcon Refinery Superfund Site? I note in the new site status summary that sampling is supposed to resume in August 2012. I have a copy of the initial RI/FS Work Plan and also the data from the initial sampling (which was provided to me by Steve Halasz when he was with Kleinfelder and working directly for NORCO). Is there a work plan that describes the work that will be done in August? Was there ever a report of the conclusions from the first data collection efforts in 2007-2008?

Any assistance would be appreciated.

Regards,

Matt
